

TOMORROW'S OPERATIONS —
FOR TODAY'S MANUFACTURERS

Technology Roadmap Opportunity for NYC Manufacturers

Project led by
Ops21 Partner:

Develop a Technology Strategy to Reduce Costs & Improve Operations. Funding Available.

To apply:
bit.ly/Tech_Roadmap

Only one NYC
manufacturer will
be selected; to be
considered, **complete
the application by
April 19th**

**To see eligibility
requirements:**
bit.ly/Ops21_Eligibility

Project cost:

\$75,000; the selected
NYC manufacturer is
required to contribute
at least 50% (\$37,500)
of project cost.

The Ops21 Technology Roadmap project helps identify the best technology innovations for your business. Our experts will come to your shop floor, recommend immediate improvements, and develop a strategy to address your most pressing technology challenges.

As a result of this project, your company will receive a technology strategy customized for your business, which will include:

- **Current state assessment** including a floor audit and five immediate improvement suggestions
- **Two immediate improvement recommendations** will be selected, and a more detailed implementation plan will be provided for each. This will include suggested technology and where applicable, a list of potential suppliers, etc.
- **Future state and gap assessments**
- **A three-year roadmap providing implementation recommendations** on up to three longer-term technology innovations. This will include recommended implementation timeline, concept overview (drawings), economic justification estimate, high-level bill of materials, etc.

This customized strategy will enable you to successfully navigate technology adoption and deployment, prioritize investments, and lead to benefits for your business that may enable cost reductions, improve quality, address workforce challenges, etc.
